

"Letter" to Benny Formal Project Directions

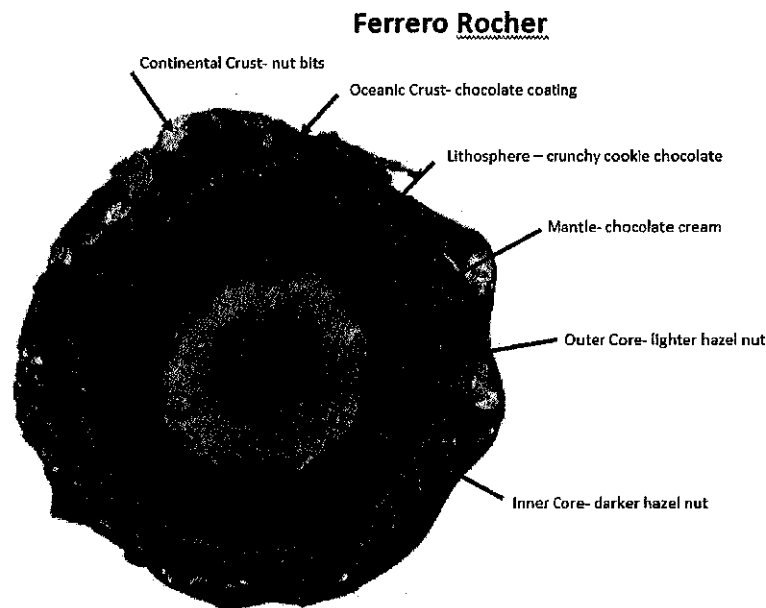

1) Read pages 83 and half of 84 (until Investigation Expo).

2) Write a "letter" to Benny (using the format provided) about his egg model and suggest a NEW model that he could use. Be sure to be descriptive when you are explaining your model and your model's layers. See my example below to help you get started:

Teacher Example (you may NOT use):

- You must use COMPLETE sentences throughout the entire project.
- You will need two to three strengths and two to three weaknesses for Benny's model and your model.
- Explain your model: support why you choose it, RELATE to each Earth's layer. Explain how your layers are similar to Earth's-- example: The nuts in the top layer of my model represents the continental crust because it is the thickest part of the crust. It is like mountains on the Earth's crust.
- USE Items: Benny's Model and Layers of the Earth to HELP! BE DESCRIPTIVE!
- Your picture MUST be a labeled drawing of your model (see example below although mine is not a hand drawing 😊)

*****NO EGG OR CAKE MODELS---MUST BE BETTER THAN BENNY'S MODEL!!!**
(Cake is not a good model because it is all the same consistency just different colors)
