

All about Air

- Imagine that you could look at a sample of air through an extremely powerful magnifying tool--what do you think it would look like? Describe and sketch.

- *What is the simplest substance that cannot be broken down anymore?*

- *Have you ever blown air into a drink through a straw? What happened? Why do you think this happened? (use knowledge from the cup demo)*

- *A water bottle with no water in it is sitting on the table. Your friend says the bottle is empty. What would you tell your friend about the bottle? Would you describe the bottle as empty?*
