

Using the Lunar Calendar below, answer the questions.

- 1) Identify and label the New Moon and the Full Moons (label on calendar then list the dates below along with the type of moon phase).
- 2) What would the January 5th moon look like? (Complete in the calendar). Label the moon phase.
- 3) What would the January 25th moon look like? (Complete in the calendar). Label the moon phase.
- 4) Identify and list the date(s) of waning moon. How do you know?
- 5) Identify and list the date(s) of a waxing moon. How do you know?
- 6) How many (approximate days) from the new moon is the next full moon?

Critical Thinking (aka Challenge your brain questions)!

- 7) Which dates would you be able to see the moon phase(s) in the evening?
- 8) Which dates would you be able to see the moon phase(s) in the morning?

Hint: use what you know about the New Moon Phase to help!
