

Toaster Demonstration Notes/ Questions

Toaster Demo Notes:

Analyze Your Data:

Share your list of changes with your group, and answer these questions. Be prepared to share your answers with the class.

- What changes did you identify?
- What type of energy was transformed to what other type in each change you saw?
- What energy transformations can you identify in the toaster? Read Three Other Types of Energy to help you understand some of the types of energy you have not seen before in this Unit.
- Which of these indicators show that energy is being transformed? Describe each energy transformation.
- How would you describe energy based on what you observed in this demonstration? Use your own words.
